

Enforcement Related to Off-Label Marketing and Use of Drugs and Devices: Where Have We Been and Where Are We Going?

Off-label use and marketing of drugs and medical devices create a minefield of potential legal problems. John Joseph, a Partner in our White Collar Defense, Compliance and Risk Management Group, recently co-authored an article titled "Enforcement Related to Off-Label Marketing and Use of Drugs and Devices: Where Have We Been and Where Are We Going?"

The article, which was published in the *Journal of Health & Life Sciences Law*, summarizes the state of play in the area of federal off-label marketing enforcement. The most recent legal and medical standards associated with off-label use and marketing are discussed in the context of a survey of all criminal and civil off-label enforcement prosecutions. The article identifies and analyzes current federal regulatory issues surrounding off-label marketing and provides practical pointers on regulatory compliance and the risks associated with fraud and abuse laws.

We provide this timely article on this evolving area of law enforcement as a service to our clients.
