

Heavy/Highway & Utility Construction

Overview

With respect to these types of heavy/highway and utility construction projects, we have handled all kinds of legal matters, including:

- Contact and subcontract review, drafting and advice
- Analysis of prime contract "flow through" obligations
- Bidding and bid compliance issues, including Disadvantaged Business Enterprise (DBE) requirements
- Bid protests and injunction actions
- Value engineering claims
- Quantity overrun claims
- Subsurface utility and conflict issues
- Utility relocation and interference issues
- Unforeseen conditions and differing site conditions claims
- Design errors and misrepresentations by project design professionals
- Delay, disruption and inefficiency claims
- Acceleration and constructive acceleration claims
- Payment claims, including prompt payment remedies and recoveries
- Product failures on mass transit electrical and similar systems
- Asphalt/stone and other material plant certification and compliance issues
- Concrete strength failures and causation analysis, and
- Occupational Safety and Health Administration (OSHA) compliance issues, including contesting non-compliance citations.
